

ONLINE BANKING SYSTEM

[Github](#)

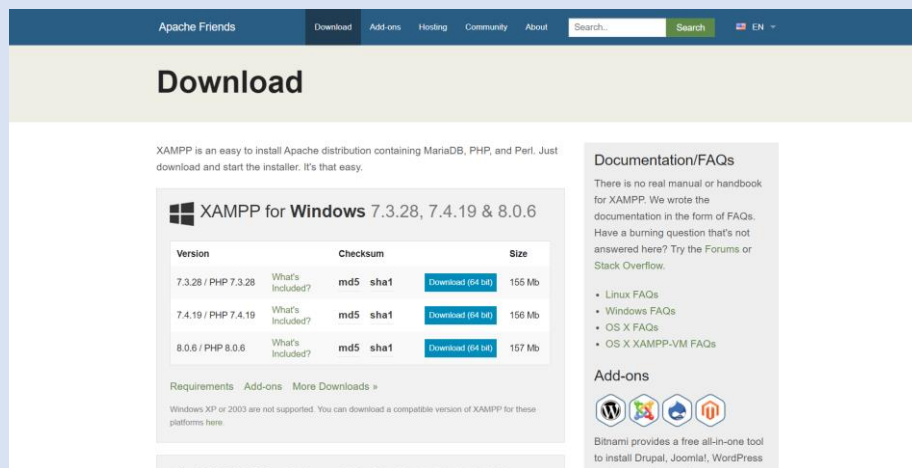

[LinkedIn](#)

Detailed steps in using this project intended for beginners

1.Install XAMPP

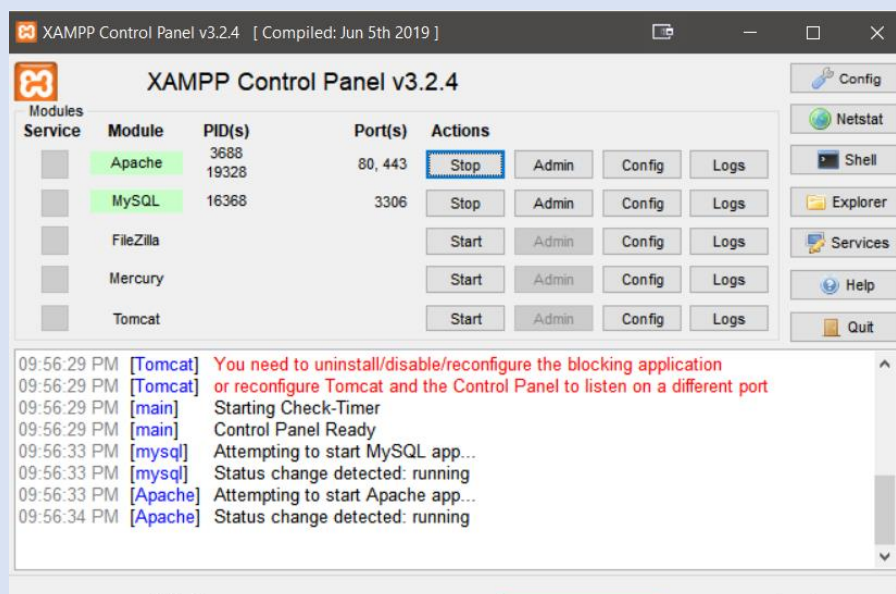

Install XAMPP from the below link

<https://www.apachefriends.org/download.html>

2.Open XAMPP

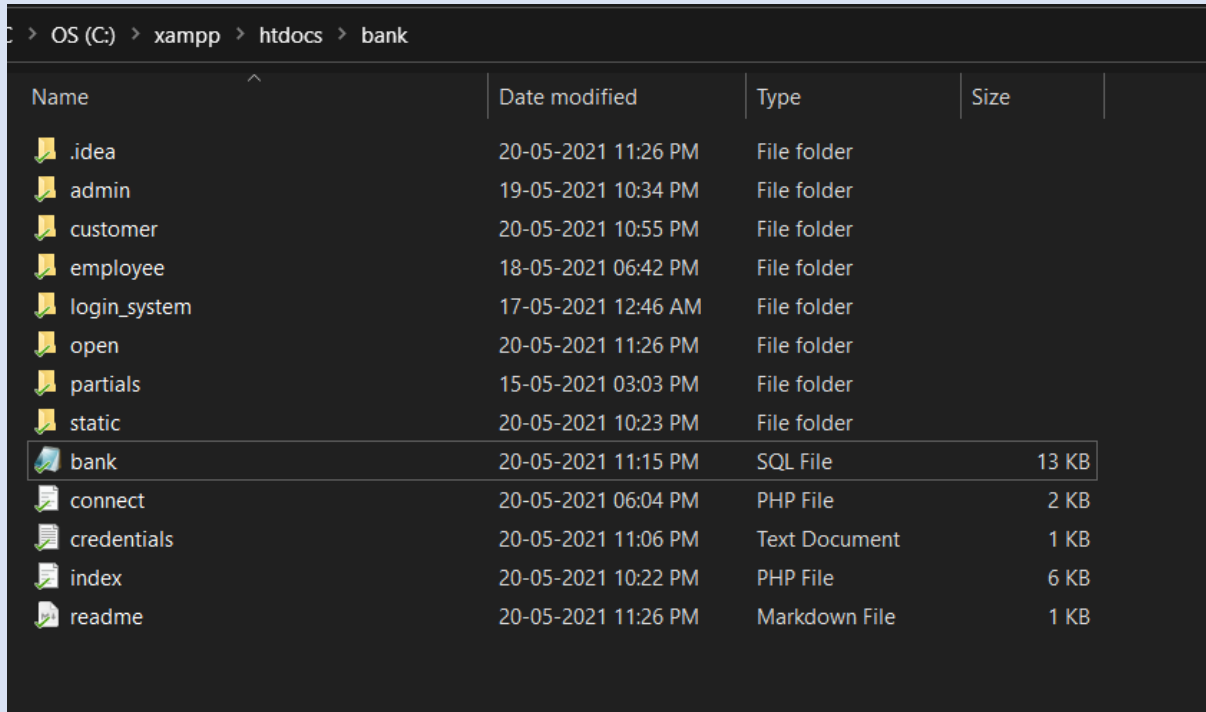

Run Apache and MySQL

www.gokulh.ml

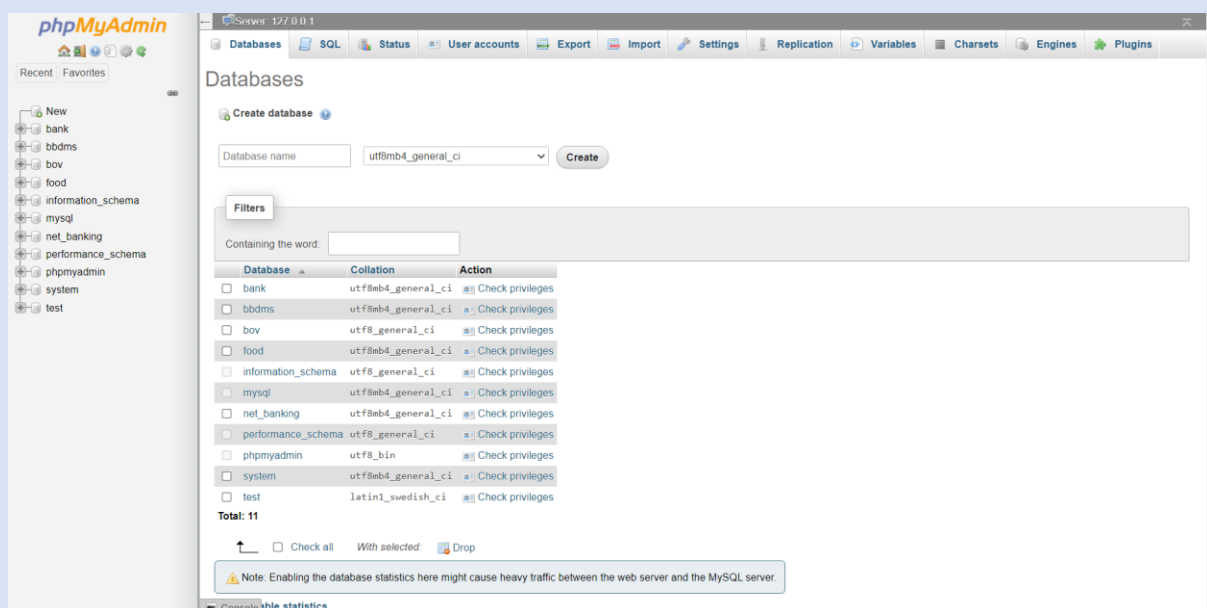

3.Download and extract this repository

4.Go to C drive navigate to htdocs folder inside xampp and paste this folder there

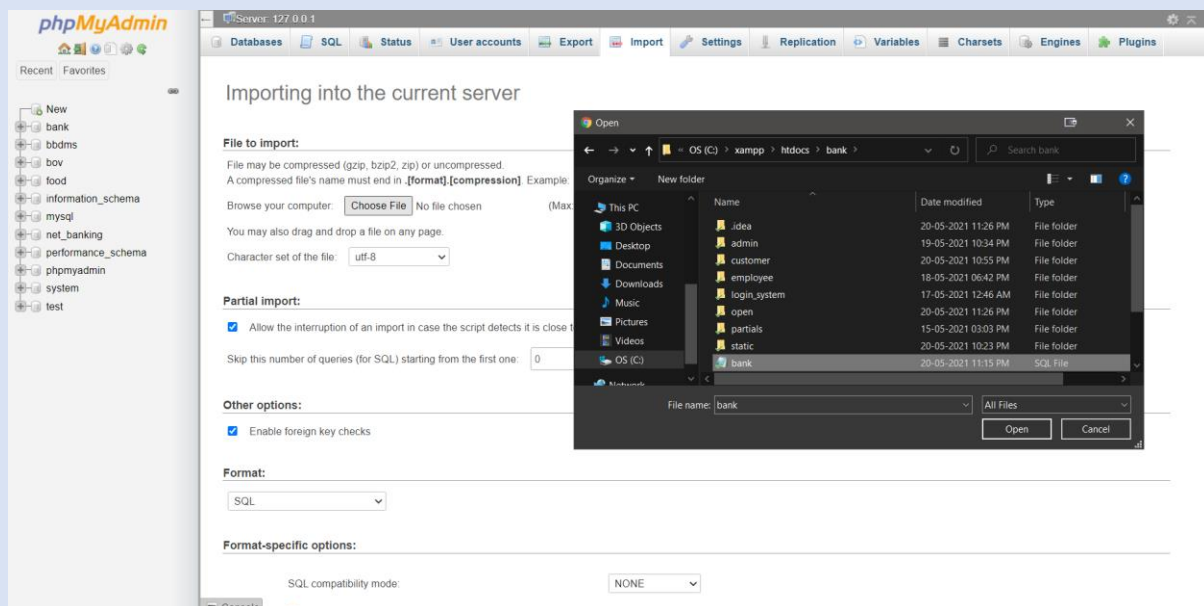

Name	Date modified	Type	Size
.idea	20-05-2021 11:26 PM	File folder	
admin	19-05-2021 10:34 PM	File folder	
customer	20-05-2021 10:55 PM	File folder	
employee	18-05-2021 06:42 PM	File folder	
login_system	17-05-2021 12:46 AM	File folder	
open	20-05-2021 11:26 PM	File folder	
partials	15-05-2021 03:03 PM	File folder	
static	20-05-2021 10:23 PM	File folder	
bank	20-05-2021 11:15 PM	SQL File	13 KB
connect	20-05-2021 06:04 PM	PHP File	2 KB
credentials	20-05-2021 11:06 PM	Text Document	1 KB
index	20-05-2021 10:22 PM	PHP File	6 KB
readme	20-05-2021 11:26 PM	Markdown File	1 KB

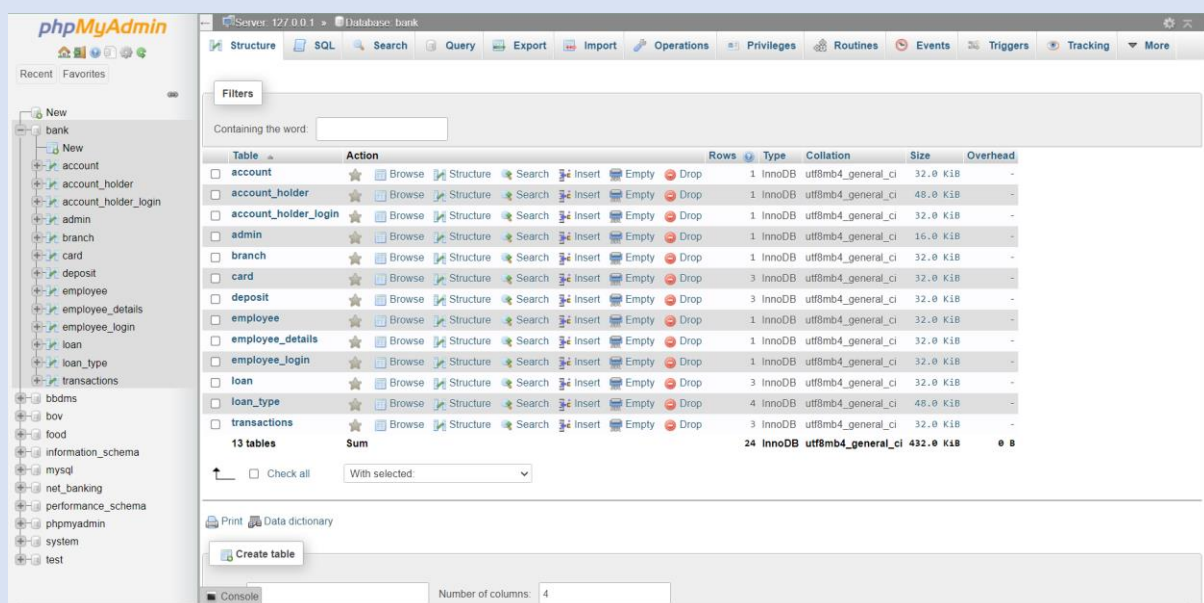

5.Now go back to XAMPP and click on admin corresponding to MYSQL
You will reach a similar website as seen below

6. Create a new database called the bank and go to the import tab at the top

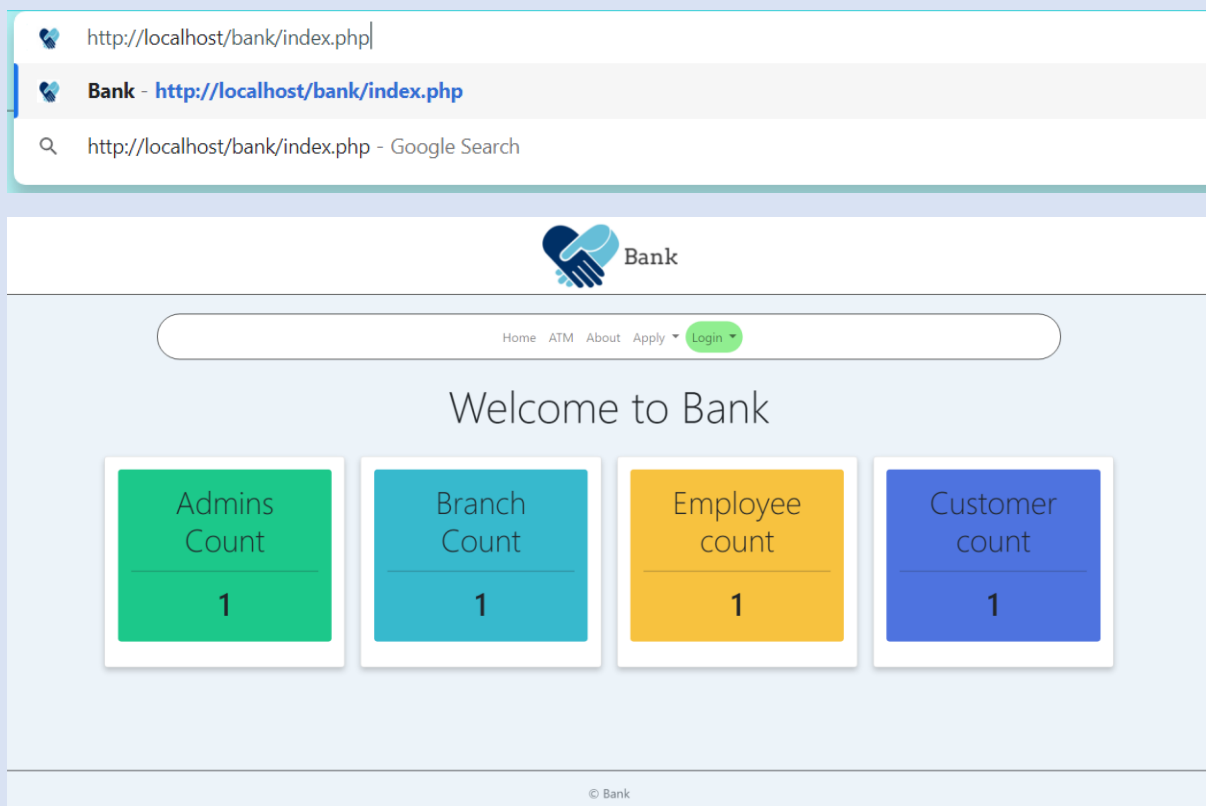

7. Click on go and all the tables will be automatically imported

8. Now open a new tab and type in following address

<http://localhost/bank/index.php>

Now you are all set to explore the website

You can find more functionalities of each section by going into the about tab

Note:

If you want to change the connection settings of the database modify the connect.php file.

You can find the credentials for various user types in credentials.txt
